INDEX

A
absorption coefficient 68
absorptivity 16, 33, 65
acceleration of gravity 129
adiabatic 107
ACSL 20
albedo 86
altitude 72, 74, 78
amplitude 34
analog computer 19, 20, 21
anemometer 47
arbitrary function generator (AFGEN) 130
atmospheric emissivity 36, 50
atmospheric transmittance 72
azimuth 74, 75, 78

B
BASIC 21
Black mulch 87
Blackman's expression 157, 166
boundary condition 22
boundary layer 154, 155
burial 9

C
carbon dioxide concentration 119
CO_2 diffusion 119
CO_2 enrichment 119, 153
CO_2 generation 119, 120
Central Standard Time 75
chemical potential 129
clear mulch 87
cloudiness 107, 118
condensation 87, 109
condensed water 88
constant 24, 34
construction 2
control function 141, 142
controlled value 144
convection 45
convective heat transfer 47
covering materials 14

CSMP (Continuous System Modeling Program) 20
CSSL 20

D
dead time 143
decay curve 42
delay time 143
DELT 23
depression factor 131
deterioration 6
dew point temperature 94, 107
differential equation 21
diffuse... 48
diffusivity 41
digital computer 3
digital simulation 19
direct film covering 5
direct solar radiation 36, 50
dismantling 2
double layer 100
downward long wave radiation 62
dry matter 165, 166
Duhamel's integral 149
durability 7
dynamic response 149
DYNAMO 20

E
effective radiation 41
electromagnetic wave 69
emissivity 85
energy balance 27
equation of time.. 75
error 144
EVA (Ethylene vinyl acetate) 14
evaporation 87, 93, 129
EVOH (Polyethylene vinyl alcohol) 14
extinction coefficient 69, 70

F
feedback control 144, 148
feedforward control 148, 149
FINTIM 23
first-order delay 143
floating mulch 1, 11, 13
floating row cover 11, 13

floor-heating 144, 145, 149
FORTRAN 20
FRA (Fiber reinforced acrylic) 14
freezing. 6
Fresnel relation 69
FST (Fortran Simulation Translator) 20
FRP (Fiber reinforced plastic) 14

G
geographical latitude 74
Gibb's free energy law 129
glasshouse 2
GPSS 20
growth curve 42
GSI (Greenhouse Soil's Wetness Index) 87, 96, 113

H
heat flow 22
heating system 141, 142
heat transfer 32
humidity ratio 33
hydraulic conductivity 133
hydroponic system 3
hyperbolic curve. 157

I
incident angle 68, 70
incineration 9
index of refraction 68
internal resistance 154, 155, 157
interpolation 34
INTGRL 21, 23, 25
irradiation 95

L
Lambert-Beer's law 68
latent heat 46, 86, 155
latent heat due to vaporization 46
latitude 74
leaf area index 167, 168
light penetration 167
logarithmic distance 34
logistic curve 43
longitude 74
long-life structure 3
long wave radiation 32

M

Maple 21
mass transfer coefficient... .... 33, 40
Mathematica..... 21
mathematical expression 23
Mathcad 21
MATLAB 21, 39, 63, 139, 152, 171
mean solar time 75
microbial activity 119
Micro-CSMP..... .... 20, 144
MIMIC 20
model representation 29
mulching..... 9

N

net radiation..... 34
non-dimensional number.. 47
non-directional 72
non-linear 19
non-stiff differential equation..... 39

O

ode function..... 39
Ohm's law..... 155
overshoot..... .... 145, 147, 148

P

pad and fan greenhouse.... 107
PC (Polycarbonate) 14
PCSMP. 20
PE (Polyethylene)..... 14
periodic change 64
periodic curve..... 43
permeability..... 86
PETP (Polyethylene telephtalate).... 14
photosynthesis rate..... 166
physiological response 153
PID (Proportional Integral and Differential) 144, 145, 148
plant growth 153, 165
plant stomata 153
plastic wastes..... 8
PMMA (Polymethyl methacrylate) 14
potential evaporation..... 58
PP (Polypropylene) 14
predictive model. 148

process variable.. 144
proportional constant..... 144
PRTPLOT..... 23
psychrometric chart..... 55
psychrometric constant..... 156
PVC (Polyvinyl chloride). 14

Q
Q10 function 154, 172

R
rain shelters 11, 14
rectangular hyperbola (Michaelis-Menten relation)..... 43
recycling..... 9
reflectivity 14, 33, 47
reproductive stage 165
respiration..... .... 119, 153, 155
response 142, 143
response curve.... .... 43, 143
rigid-plastic house..... 3
root respiration 119
row covers..... .... 1, 3

S
second or higher order delay..... 143
sensible heat..... 156
set point 144
Sherwood number 54
SIMAN. 20
SIMNON..... 20
simulation language 15, 24
SIMULINK..... 20
soil..... 24
soil-plant-atmosphere continuum (SPAC)..... 129
solar constant..... 47
solar radiation..... .... 22, 45, 50
steady-state condition..... 34
Stefan-Boltzmann constant 46
STELLA..... 20
stiff differential equation.. 40
stomatal resistance..... .... 154, 157
sun's altitude..... .... 72, 74, 78
sun's azimuth..... .... 74, 75, 78
sun's declination angle..... .... 75, 76, 77
SYSL.... 20
system dynamics 15

T
thermal conductivity..... 28
thermocouple..... 85
tilt angle 78
time constant 144, 152
TIMER.. .... 23, 25
transmissivity 16, 47
transparent..... .... 13, 16
true solar time..... 75
tunnel.... .... 11, 13
turbulent 47
typhoon. 7

U
undershoot..... .... 145, 147
unheated greenhouse..... .... 14, 100, 107
unit response 149
unit step function 143

V
vapor diffusivity. 130, 131, 133
vapor flow 46, 129, 131
vaporization..... 46
vapor potential.... 46
vapor flow gradient 133
vegetative growth..... 165
ventilation..... .... 75, 125
ventilation amount..... 125
ventilation rate.... .... 42, 125
view factor..... 59
volumetric heat capacity... 27
volumetric water content.. 130

W
wastes... 8
water content..... .... 130, 133
water flow gradient 133
water potential.... 129
water vapor..... .... 53, 131
water vapor diffusivity 133
water vapor pressure 129, 131
wavelength 61
weighing function 149
wet-bulb temperature 58
white mulch..... 87
