

Neoteric Water Solutions Inc.

Oxygenated water produced by Neoteric Body Energizer.

Oxygen that is readily, assimilated by your body: Oxygen your body can utilize is the most beneficial gift you can give your body to maintain your good health a youthful appearance, energy, strength and endurance.

"All chronic pain, suffering and diseases are caused from lack of oxygen at cell level".
(C. Guyton, M.D. The Textbook on Medical Psychology)

"Virtually all heart attacks come down to a failure to deliver oxygen to the hardworking heart muscle". (Philip Stavish, M.D. Oxygen Deficiency Linked to Increase Disease)

"Hypoxia, or lack of oxygen in the tissues, is the fundamental cause for all degenerative disease". (Steven A. Levine, Ph.D. and Paris M. Kidd, Ph.D. Antioxidant Adaptation)

"Lack of oxygen clearly plays a major role in causing cells to become cancerous". "Oxygen plays a pivotal role in the proper functioning of the immune system". (Dr. Harry Goldblatt, Journal of Experimental Medicine)

"It is the lack of oxygen in proper amounts in the system that prevents oxidation and oxygenation, which energizes the cell to biological regeneration. These process are the foundation of life and death". (Stephen R. Krauss, O₂xxygen: Nature's most important dietary supplement)

"If the body is being starved of oxygen, then to avoid illnesses, the oxygen must be supplemented by nutritional supplements such as stabilized oxygen". (John Muntz, D.O., Ph.D. The case for stabilized oxygen)

You require a minimum of oxygen to live. You need to generously supplement O₂ to live abundantly.

Public understanding has growing substantially concerning the importance of properly oxygenating your body cells. However, an understanding of how to accomplish this is still largely, a mystery. Why, when O₂ is regarded as the wonder supplement are there reports from users being disappointed with their results.

The method by which additional oxygen is added to the water, and how it's delivered to the body cells is, in our opinion, the critical difference. Can your body's cells assimilate the oxygen, or can it not make use of the oxygen.

Neoteric technology prepares the water for your consumption to enabling full utilization of the oxygen it contains. This will supply you with good health, giving your body the tools to help you improve energy, endurance, strength, and appearance.

At Neoteric, a very specific combination of conditions have been developed to give our water these significant results

1. A high amount of oxygen introduced into the water, this oxygen is introduced in a truly dissolved state becoming part of the water's make up not just mixed with the water as a separate entity.
2. The O₂ water molecules are conditioned to a state where the body's cells can accept them.
3. The over all water is conditioned making it readily acceptable by the body.

At Neoteric Water Solutions, we have learned the secret to producing high amounts of truly dissolved oxygen, up to 22 ppm in water. Comparing this with the best of natural waters, (clean and mountain aerated) quality, which at sea level and 30 degree centigrade, has saturation at 7.6 parts per million-dissolved oxygen. We have altered the gas balance of the water from 21.7% oxygen, to 78% nitrogen, to approximate 60% oxygen and 40% nitrogen.

This high % of relatively stable oxygen we believe is “overkill” when considering the amounts needed to fully satisfy body cells. However, it is good to know that an abundance of O₂ is available to the cells so they will never be shortened. The key component, however, is to successfully supply the cells with O₂, delivered it in an assimilability state.

The process that Neoteric's O₂ water has gone through has softened the water to a very smooth, low resistant product as well as sizing the O₂ molecules to fit the cells needs. It's this combination with an abundant supply of O₂ that satisfies the condition of proper delivery. When successfully done, it leads to the huge benefits O₂ will provide. This treatment is totally unrelated to the merely gas injected O₂ method.

The vast majority of drinking water that attempts oxygen enhancement is done with forced gas. This process is easily done and any one can do it. Basically, just secures a tank of O₂ gas and hose the O₂ into the water.

This can raise the oxygen level, according to a D.O. meter, to nearly any number you wish to advertise. This O₂ will gas off quite quickly much as a carbonated soda pop drink will. However, this is not the major problem with this scenario, incompatibility with the body's cells, is why, it is virtually useless in fact it may well be detrimental to your well-being.

As vitally beneficial as the oxygen your body will receive from this wand is, it is however, an "added value" to the original purpose of producing highest quality purified water possible. Highest quality water treatment would not only have to remove virus and bacteria, both aerobic and anaerobic, heavy metals, and chemicals, but every bit as importantly leave in the water the minerals nature intended to be in solution to benefit your body's mineral needs.

The Neoteric treatment process delivers on all counts;

- Kills virus and anaerobic bactericide upon contact with its catalytic action.
- The aerobic, which lives on oxygen, cannot handle the large dosage and explode.
- Chemicals break-up into their original forms, and harmlessly gas off.
- Heavy metals coagulate, sink, and will not re-enter into solution.
- The minerals intended for water's full benefit are left in the water. This is in contrast to stripped water produced by the most common bottled water available.

This little wand uses very little low voltage DC electricity, just plug in and use. The water is circulated by gravity, and will saturate the water with especially conditioned O₂ for your good health, energy, endurance, and turns you towards youthfulness: it's the oxygen. .
